- **Computers & Displays**
- **Printers & Accessories**
- **Deployment & Support**

HARDWARE SUPPLY / PROFESSIONAL SERVICES / ONGOING SUPPORT

Lahore, Pakistan

Nationwide delivery

01 / WHO WE ARE

One partner for your complete IT environment.

Business technology brought together through product supply, deployment and technical support.

ITCHAMPX is a Lahore-based IT solutions and hardware company helping businesses source, implement and maintain the technology they use every day. Our portfolio spans IT infrastructure, servers, networking, cybersecurity, surveillance, computers, printing and essential accessories.

We connect the entire requirement - from a keyboard, USB drive or office printer to a coordinated infrastructure project - through one point of contact. The focus is practical: suitable equipment, compatible systems, clear scope and dependable support.

SUPPLY

Hardware, peripherals and infrastructure equipment selected for the requirement.

DEPLOY

Installation, configuration and integration across the business environment.

SUPPORT

Troubleshooting, maintenance and ongoing assistance under an agreed scope.

Founder & CEO

A Solution Providing Company

Lahore-based. Serving customers across Pakistan.

02 / OUR SERVICES

Expertise across every layer of business IT.

Engage ITCHAMPX for a focused requirement or combine services into a complete solution.

IT infrastructure & networking

Network design, routing, switching, Wi-Fi, structured cabling and rack deployment.

Servers, storage & backup

Business server platforms, virtualization, storage planning and recovery readiness.

Computers & workplace IT

PC and laptop supply, workspace setup, displays, printing and peripheral integration.

Cybersecurity & secure access

Firewalls, VPN connectivity, access policies and network segmentation.

Surveillance & physical security

CCTV cameras, NVRs, recording storage, remote viewing and supporting infrastructure.

Business communications

IP PBX, VoIP, IP phones, extensions and call-routing configuration.

Web & digital services

Business websites, landing pages and social media marketing services.

IT support & maintenance

Fault diagnosis, preventive maintenance, upgrades and agreed support arrangements.

03 / INFRASTRUCTURE & CONNECTIVITY

The foundation for connected operations.

From the cable and cabinet to the network, wireless coverage and branch connection.

01 Network architecture

LAN and WAN planning, routing, switching, VLANs, inter-VLAN access, uplinks and network segmentation.

02 Business wireless

Access points and controllers, SSID planning, guest Wi-Fi, coverage improvement, channel tuning and roaming.

03 Structured infrastructure

Copper and fiber cabling, patch panels, racks, cabinets, termination, labeling and cable management.

04 Internet & branch connectivity

Multi-WAN configuration, failover, VPN links and performance troubleshooting across sites.

Designed around your business.

- Users & devices
- Applications
- Coverage & capacity
- Security needs
- Future expansion

ASSESS. DESIGN. CONNECT.

04 / SERVERS, STORAGE & OPERATIONS

Reliable systems for business workloads.

Plan capacity, deploy the platform and support the environment as your requirements grow.

Compute. Store. Protect.

Server hardware, storage and virtualization brought together with backup planning and practical operational support.

Server platforms

Rack and tower servers, memory and storage upgrades, operating-system installation and workload-oriented configurations.

Virtualization & storage

Virtual machines, resource allocation, shared storage and data organization aligned to capacity and compatibility.

Backup & recovery planning

Backup schedules, storage selection, recovery procedures and validation of restore requirements.

Systems support

Installation, configuration review, troubleshooting, upgrades and ongoing technical assistance.

HARDWARE + CONFIGURATION + HANDOVER + SUPPORT

05 / SECURITY & SURVEILLANCE

Protect your network. See your environment.

Coordinated digital security and surveillance for business premises and connected operations.

Cybersecurity

Control how users, devices and sites connect.

- Firewall supply, installation and configuration
- VPN access for branches and remote users
- Network segmentation and access policies
- Secure management and configuration review
- Endpoint security requirements and supported licensing

Surveillance

Build visibility around the site and its priorities.

- IP cameras and CCTV solutions
- NVR/DVR and recording-storage planning
- Camera positioning and coverage requirements
- PoE, cabling and network integration
- Secure viewing and system handover

Integrated by design. Cameras, recording, users and remote access are planned together with the supporting network.

06 / WORKPLACE TECHNOLOGY

Equip every desk. Support every workday.

Business computers, printing and everyday accessories are a core part of our product portfolio.

Computers & displays

Desktops, laptops, workstations and all-in-one systems. Monitors, display cables, mounts, RAM, SSDs and hardware upgrades.

User-ready workspaces and equipment refreshes.

Printing & scanning

Laser and inkjet printers, multifunction printers, scanners, toner and ink requirements. Network and shared-printer setup.

Document handling for teams and office operations.

Accessories & peripherals

Keyboards, mice, USB flash drives, external storage, webcams, headsets, USB hubs, docking stations, adapters and charging accessories.

The small essentials that keep a business productive.

INDIVIDUAL REQUIREMENTS / TEAM ROLLOUTS / REPEAT PROCUREMENT

07 / PRODUCT PORTFOLIO

One source.
A complete product range.

A practical sourcing portfolio for IT teams, procurement departments and business owners.

CATEGORY	REPRESENTATIVE PRODUCTS
Computing	Desktops, laptops, workstations and all-in-one PCs
Displays & peripherals	Monitors, keyboards, mice, webcams and headsets
Printing & scanning	Printers, multifunction devices, scanners, ink and toner
USB & accessories	Flash drives, external drives, hubs, docks, adapters and cables
Servers & storage	Rack/tower servers, RAM, HDDs, SSDs and storage solutions
Networking & wireless	Routers, switches, access points and wireless controllers
Security appliances	Firewalls, VPN platforms and supported security subscriptions
Surveillance	IP cameras, CCTV, NVR/DVR equipment and recording drives
Voice & communications	IP phones, PBX systems, SIP endpoints and headsets
Infrastructure & power	Racks, patch panels, Cat6/fiber, SFPs, PoE, PDUs and UPS

Equipment selection is matched to compatibility, workload and budget. Model, condition, warranty, availability and delivery are confirmed in each quotation.

08 / BRANDS & TECHNOLOGIES

Multi-brand choice. One solution perspective.

Recognizable technology platforms, selected for fit, performance, compatibility and support.

- Cisco
- HP
- Huawei
- Fortinet
- Sophos
- Dell
- Hewlett Packard Enterprise
- MikroTik
- Ubiquiti
- Ruckus Networks
- TP-Link
- Juniper Networks

Additional product ecosystems: Hikvision, Dahua, Ruijie/Reyee, Microsoft and Polycom, according to project requirements and availability.

Brand names and logos identify products and technologies; they do not imply authorized partner status. Trademarks belong to their respective owners.

09 / DELIVERY & SUPPORT

A clear path from requirement to operation.

Start with equipment supply, a deployment project or an ongoing technical support arrangement.

1. **Discover**
   Understand users, sites, applications, priorities and existing equipment.
2. **Design & quote**
   Define the scope, equipment, compatibility, responsibilities and budget.
3. **Source & prepare**
   Confirm availability, arrange hardware and prepare the deployment.
4. **Deploy & validate**
   Install, configure and check the agreed functional requirements.
5. **Handover & support**
   Provide the agreed documentation, user guidance and support arrangements.

WAYS TO WORK

Hardware supply

One-off purchases, repeat procurement and equipment refreshes.

Project delivery

New offices, expansion, migration and infrastructure upgrades.

Support & AMC

Remote or on-site assistance, troubleshooting and planned maintenance.

Support hours, response commitments, visit schedules and service scope are agreed for each engagement.

10 / SELECTED EXPERIENCE

Practical work. Business-focused outcomes.

Selected engagement examples and organization references from our existing portfolio.

01 Hospitality Wi-Fi

The Residency Hotel Lahore

Ruijie/Reyee Wi-Fi 6 deployment. Customer feedback highlights a smooth setup, strong coverage, multi-user performance and easy management.

02 Infrastructure modernization

Selected corporate project

Core network migration from 1G to 10G, with fiber backbone work, routing, VLANs and organized infrastructure for future capacity.

03 Multi-branch equipment supply

Customer procurement experience

IT equipment supplied for two branches, with after-sales assistance highlighted in the customer feedback.

SELECTED ORGANIZATION EXPERIENCE

Pakistan Rangers (Punjab)	Ramada by Wyndham
Best Western	COLABS
Linkers Communication	Naveena Denim
COMSATS University	NASTP

11 / CUSTOMER FEEDBACK

Customer voices. Service that earns trust.
